Instant Rebates on Smart Home Devices

SDG&E customers are eligible to receive a \$50 instant rebate on Nest and ecobee smart thermostats – the most popular brands on the market. Considered an essential part of any smart home, smart thermostats can help reduce energy bills and increase comfort. Nest and ecobee products come with mobile apps so people can remotely control their home's temperature anywhere anytime.

Customers can get the rebate by visiting sdge.com/instant to generate a coupon code. You redeem the code when you purchase a qualifying Nest or ecobee thermostat on bestbuy.com, lowes.com or participating Lowe's stores in town (Mission Valley/San Diego, Oceanside, Vista, Santee, Otay Lakes/Chula Vista, Carlsbad, Escondido and Poway).

Customers who take advantage of the instant rebates can get an ADDITIONAL bonus of up to \$75, if they sign up for the SDG&E [Reduce Your Use Thermostat program](#). Participants in this program are asked to occasionally reduce their power consumption when energy demand is high on the grid by allowing their thermostat settings to be automatically adjusted.

Customers looking for good deals on energy-efficient products are encouraged to visit [SDG&E's Marketplace](#). You can compare items in terms of prices, energy efficiency ratings, popularity ratings, and product specifications.
